Summary

Full Stack Developer specializing in AI-integrated web applications and scalable backend systems. Experienced in developing RESTful APIs, designing secure authentication systems (JWT), and integrating third-party AI services.

Education

Govt College of Engineering and Research, Avasari Khurd, Pune Aug 2022 – Present
B.E. in Computer Engineering

Skills

- **Languages:** Java, Python, C++, JavaScript
- **Frontend:** HTML, CSS, React.js
- **Backend:** Node.js, Express.js, Flask, REST APIs
- **Database:** MongoDB
- **Tools:** Git, GitHub, Postman, VS Code, Render
- **Core:** Data Structures & Algorithms (practiced through 140+ problems), Debugging, System Thinking

Experience

Web Development Intern, Cognifyz Technologies Dec 2024 – Jan 2025

- Enhanced client-facing web interfaces using HTML, CSS, and JavaScript, improving usability and responsiveness across devices
- Developed responsive UI components to ensure consistent performance across multiple screen sizes
- Strengthened code quality and reusability, contributing to a 30% improvement in client demo feedback

Projects

AI-Powered Text Summarizer Aug 2025

- Engineered a full-stack AI-powered summarization platform using Node.js, Express.js, and MongoDB to process text and URL inputs efficiently
- Integrated Google Gemini API for intelligent summary generation and enabled multilingual output using Google Translate API
- Designed a secure authentication system using JWT and bcrypt for reliable user session management
- Developed RESTful APIs to handle user requests and database interactions efficiently
- Built an email support module using Nodemailer for handling user communication

Movie Recommendation System Jan 2024

- Built a recommendation platform using Flask and MongoDB to deliver personalized movie suggestions
- Designed authentication workflows and user preference-based recommendation logic
- Integrated YouTube API to fetch real-time movie trailer previews
- Enhanced content discovery through personalized recommendation pipelines

Technical Highlights

- Integrated AI-powered backend features using Google Gemini API
- Designed secure authentication systems using JWT and password hashing
- Developed multiple RESTful APIs and managed complete full-stack workflows

Interests

Sports, Music
