SUMMARY

Computer Engineering graduate with hands-on experience building full-stack, product-grade web applications — including an AI-powered SaaS platform with payment integration and a Best Paper Award publication. Skilled across RESTful API design, secure authentication, and relational/NoSQL databases. Currently strengthening core CS fundamentals through consistent Data Structures & Algorithms practice (143+ problems on LeetCode) alongside practical, project-driven engineering.

EDUCATION

Government College of Engineering and Research, Avasari Khurd, Pune *Aug 2022 – Jul 2026*

Bachelor of Engineering in Computer Engineering — CGPA: 8.39

Class 12 (Maharashtra Board) – Lord Public School, Bhandara — 87.5% | Class 10 (CBSE) – Spring Dale School, Bhandara — 82.2%

SKILLS

Languages: C++, Python, JavaScript

DSA: Problem Solving, Time & Space Complexity Analysis

Backend: Node.js, Express.js, FastAPI, Flask, REST APIs

Frontend: React.js, Next.js, HTML5, CSS3

Database & Cloud: MongoDB, PostgreSQL, Supabase

Tools & Integrations: Git, GitHub, Postman, Razorpay API, Gemini API, JWT/OAuth

PROJECTS

FoundrKit — AI-Powered Virtual Co-Founder SaaS Platform *Next.js, FastAPI, Supabase*

- Built a full-stack SaaS platform giving early-stage founders an AI co-founder for branding, content, and financial operations, using Next.js frontend and FastAPI backend.
- Developed an AI branding suite generating startup names, slogans (Gemini API), and logos (Pollinations AI) on demand.
- Implemented a usage-metered free trial system with Supabase-tracked run limits, tiered dashboard banners, and subscription expiry logic.
- Integrated Razorpay for subscription payments and built an automated invoice/PDF generation system.
- **Best Paper Award, ICRACE 2026** (Wadia College of Engineering, Pune) — published via Springer Nature.

AI-Powered Text Summarizer *Node.js, Express, MongoDB*

- Built a full-stack summarization platform processing text and URL inputs, using the Google Gemini API for AI-generated summaries with multilingual output via Google Translate API.
- Designed secure authentication (JWT, bcrypt) and RESTful APIs for user session and data management.
- Added an email support module using Nodemailer for user communication.

EXPERIENCE

Web Development Intern — Cognifyz Technologies *Dec 2024 – Jan 2025*

- Developed responsive web interfaces and reusable UI components using HTML, CSS, and JavaScript.
- Improved cross-browser compatibility and page responsiveness following modern development practices with Git.

ACHIEVEMENTS & TECHNICAL HIGHLIGHTS

- Solved 143+ Data Structures & Algorithms problems on LeetCode, spanning arrays, trees, graphs, and dynamic programming.
- Best Paper Award at ICRACE 2026 for FoundrKit; work published via Springer Nature.
- Shipped payment integration (Razorpay), AI content pipelines (Gemini, Pollinations AI), and secure auth (JWT, bcrypt) in production-style projects.
